VirtualStudyTour:

GREEN SMEs & URBAN ADAPTATION

PROGRAMME

This exchange focusses on climate smart responses to urban adaptation necessities by Green SMEs. It proposes both to support the growth of innovators and to showcase the solutions being developed in South Africa, particularly in the context of urban resilience. These small businesses have a vital role to play in climate mitigation and sustainable development, and they have a great deal to contribute to social cohesion and poverty reduction.

Over two afternoons we will examine the following questions together:
- How best to work with urban management systems in SA? And
- What are the tools available to SMEs working in this space?

This will be a useful opportunity to learn and discuss these matters with your European and South African peers.

[Due to the unpredictability of the global landscape at this time, speakers may change without notice]

Tuesday 21 September, 2021
