VirtualStudyTour:
COMMUNICATING CLIMATE CHANGE USING DATA TOOLKITS

PROGRAMME

This exchange will be on communication about climate change using (data) toolkits for visual communication. The theme/topic for this programme arose from the previous virtual study tours where people shared their struggles to communicate matters pertaining to climate change and who were ALSO excited by the possibility of using data/graphic content to share knowledge and stimulate citizen buy-in to climate-change action. The request for an opportunity to be better equipped to use data information which *can* cross any language/ literacy-level/economic/cultural/geographic divides, featured the most frequently in participants' feedback.

Over two afternoons we will examine together:
- How to acquire, arrange and use data.
- An overview of and access to existing tool-kits for various purposes & how to choose the right tool for the job!
And we hope to do 2 short practical exercises in small groups to embed the skills learnt & gve you the confidence to use visual communication tools.

This will be a useful opportunity to learn and discuss this method of communication with your European and South African peers.

[Due to the unpredictability of the global landscape at this time, speakers may change without notice]
